

Don't miss our workshop at the Embassy Suites Cleveland-Downtown!
 October 6 & 7 Workshop & October 8 OMA Level I Certification Exam

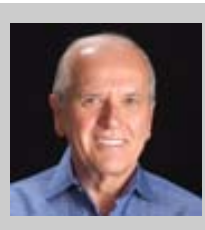

Cleveland rocks

Providing the Tools You Need to Improve Your Maintenance Program

ALS Staveley Services Fluids Analysis is pleased to present a comprehensive and interactive two-day workshop offered in conjunction with **STLE's OMA I** exam review. ALS Staveley's **APPLIED LUBRICANT FUNDAMENTALS AND OIL ANALYSIS WORKSHOP** is designed for maintenance professionals. The workshop will educate your team on the following subjects:

- New Oil Specification Training
- Lubricated Machine Components
- Contamination Control
- Oil Analysis for Equipment Reliability
- Maintenance Strategies
- Sampling Procedures
- Establishing Condemning Limits
- Lubrication Test Packages by Machine Type
- Data Evaluation
- OMA Level I Exam Preparation

About the Instructor

Ray Thibault, CLS, OMA I, II, retired from ExxonMobil with 31 years of service to form LTC, a lubrication training and consulting firm. He has since done extensive training and consulting for leading companies, such as Chevron, ExxonMobil, Shell, Valero, Mital Steel, Atofina, Newmont Gold, Peabody Energy, Citgo, and many others. As a contributing editor for Lubrication Maintenance and Technology magazine, he writes bimonthly articles on lubrication. He is the session chairman for Lubricants World held at the International and Predictive Maintenance Conferences and is an active speaker at many national conferences, such as STLE and MARTS.
