ALS Tribology is pleased to present an exclusive course in basic oil analysis techniques. This comprehensive and interactive one-day workshop is designed for maintenance professionals. The program includes educating your team on the following subjects:

- Introduction and Overview of Oil Analysis
- Classification and Properties of Oil
- Tests Performed and their Significance
- Oil Cleanliness and Particle Analysis
- Taking an Oil Sample
- Troubleshooting and Predictive Maintenance
- Interpretation of Results
- Overview of ALS Webtrieve Online Data Access and Information Management

Our Instructors

Greg Lewis has a mechanical background with over 20 years involvement in the mining, transport, and farming industries. He has hands-on experience as a qualified mechanic working on both light and heavy machinery and later as an equipment maintenance planner. For the last 21 years, Greg has been employed with ALS Tribology as a diagnostician, laboratory manager, and an operations manager. Greg is a NATA (lab accreditation) signatory and a long standing member of STLE.

Ed Eckert, CLS, OMA I, has 19 years of experience in the oil analysis industry. His expertise in oil analysis is derived from his extensive history with ALS Tribology as laboratory manager, diagnostician, technical service representative, and through his current position as diagnostics manager. Ed has earned both Certified Lubrication Specialist (CLS) and Oil Monitoring Analysis (OMA I) STLE certifications. His previous experience includes serving in the U.S. Navy as an Engineman (E-5).
